

# Basic ReCycloBot Base Plate dimensions, if constructing with hand tools.

Pat McMahon V1 19/5/2024

Note— The dimensions below are for the ReCycloBot Base Plate, with two Motors, if using hand tools. You only need the drill holes in one end, if only using one motor for the Basic ReCycloBot. You can use 1mm thick aluminum or 3 mm Ply. ( See the DXF Files if cutting using a laser. )
